1 Notices

1.1 CE Marking

This device has been tested to and conforms to the regulatory requirements of the European Union and has attained CE Marking. The CE Mark is a conformity marking consisting of the letters “CE”. The CE Mark applies to products regulated by certain European health, safety and environmental protection legislation. The CE Mark is obligatory for products it applies to: the manufacturer affixes the marking in order to be allowed to sell his product in the European market.

This product conforms to the essential requirements of the R&TTE directive 1999/5/EC in order to attain CE Marking. A notified body has determined that this device has properly demonstrated that the requirements of the directive have been met and has issued a favourable certificate of expert opinion. As such the device will bear the notified body number after the CE mark.

The CE Marking is not a quality mark. Foremost, it refers to the safety rather than to the quality of a product. Secondly, CE Marking is mandatory for the product it applies to, whereas most quality markings are voluntary.

1.2 Trademarks

Intel, **Atom**, and **Intel Quad Core** are trademarks/registered trademarks of Intel Corporation.

Microsoft, **Office 365**, and **Windows** are trademarks/registered trademarks of Microsoft Corporation.

2 Important Safety Instructions

2.1 Care & Operation

The computer is quite rugged, but it can be damaged. To prevent this, follow these suggestions:

1. Don't drop it, or expose it to shock. If the computer falls, the case and the components could be damaged.
2. Keep it dry, and don't overheat it. Keep the computer and power supply away from any kind of heating element. This is an electrical appliance. If water or any other liquid gets into it, the computer could be badly damaged.
3. Avoid interference. Keep the computer away from high capacity transformers, electric motors, and other strong magnetic fields. These can hinder proper performance and damage your data.
4. Follow the proper working procedures for the computer. Shut the computer down properly and don't forget to save your work. Remember to periodically save your data as data may be lost.
5. Take care when using peripheral devices.

2.2 Cleaning

Note: Before you clean your tablet pc, disconnect all devices (headphones, speakers, USB) and turn off the tablet. Use a soft cloth dampened with water to clean the Tablet PC. Do not use liquid or aerosol cleaners, which may contain flammable substances.

Do not allow water to seep from a soft cloth to Tablet PC ports or buttons.

Note: To avoid damaging the tablet or screen, do not spray cleaning solution onto the display directly.

Use specially designed products for cleaning the screen, and follow the instructions.

2.3 Servicing

Do not attempt to service the computer yourself. Doing so may violate your warranty and expose you and the computer to electric shock. Refer all servicing to authorized service personnel. Unplug the computer from the power supply. Then refer servicing to qualified service personnel under any of the following conditions:

- When the power cord is damaged or frayed.
- If the computer has been exposed to any liquids.
- If the computer does not work normally when you follow the operating instructions.
- If the computer has been dropped or damaged (do not touch the poisonous liquid if the LCD panel breaks).
- If there is an unusual odour, heat or smoke coming from your computer.

3. Parts and functions

Part	Function
1	<p>Power Button</p> <p>Press and hold to turn the tablet PC on/off</p> <p>Press to turn display on/off</p>

8	Rear Camera	Take a picture or video clip using the Rear view camera and make video calls
9	Micro SD Card Slot	Read and write files to the Micro SD card (not supplied)
10	Speakers	Output Audio

4 Charging accessories

A power adapter with 5V/2A and a Micro-USB connector are supplied. Use these to charge the battery for the Tablet PC.

5 Setting up your Tablet PC

5.1 Charging the Tablet PC

Note: Do not charge the battery if the ambient temperature exceeds 0 °C - 35 °C

Note: Only use the power adapter that came with your Tablet PC for charging. Using an unauthorized power adapter or Micro-USB cable can severely damage your tablet PC

Note: Batteries supplied with the tablet PC are not fully charged

1. Connect the power cord to the power adapter.

2. Connect the Micro-USB cable to the Micro-USB port on the Tablet PC

3. Plug the power adapter into a power socket and charge the Tablet until the battery is fully charged

Description: It will take approximately 4 hours to charge the Battery when the device is turned off. The device will take longer to charge if it remains turned on.

You can view the battery charging status for the Tablet PC in the following ways:

The battery icon and explanation	The battery charging light
The battery icon appears on the screen	The battery charging light is located on the right side of the Tablet PC
 Tablet PC is connected to the power supply and the battery is fully charged	When the battery charging light is red, the battery is being charged
 Tablet PC is connected to the power supply and the battery is being charged	When the battery light is off, the battery is fully charged, or not being charged
 Tablet PC is running and using the battery power. The battery is discharging	
 The Tablet PC is plugged in to a power supply and no battery is detected or battery doesn't work	
 The Tablet PC is running on battery power and the battery is low	
 The Tablet PC is running on battery power and the power is seriously inadequate	

5.2 Turning on your Tablet PC

When you open the Tablet PC for the first time, you must complete Windows Out-of-Box-Experience to start using the Tablet PC. Once completed the procedure for starting the tablet is as follows:

1. Press and hold the power button for 2 seconds to turn on the Tablet PC. The locked screen appears.
2. A finger swipe up from the bottom of the screen will switch the display to the login screen. Enter the password to log in to Windows.

3. When the Windows "Start" screen appears, you can begin using the Tablet PC.

Note: If Windows 8.1 is not enabled in the logon screen, you would enter The "Start" screen from the locked screen directly.

5.3 Power off the Tablet PC

Using the power button:

1. Press the power button for approx. 4 seconds
2. Swipe the shutdown screen to the bottom edge of the LCD screen to turn off the tablet.

Using the super button:

1. Swipe from the right edge of the screen to access the charms bar icons.

Touch the Settings icon  Touch the Power icon  Touch Shut Down

5.4 Turning the screen display on/off

Using the power button:

Press the power button once and the screen display will turn off

Press the power button once to turn it on again

Using the Settings Icon:

1. Swipe from the right edge of the screen to access the charms bar select the Settings icon.

2 Touch the Setting icon  Touch the Power icon  Touch Sleep

Note: If your tablet is in standby mode (the Tablet is turned on, but the screen display is turned off), press the power button or the Windows button to turn on the screen

5.5 Inserting a Micro SD card

Locate the Micro SD card slot at the top edge of the device and carefully insert the Micro SD card in to the slot, ensuring it is positioned the correct way up

5.6 Removing the Micro SD card

Note: Removing the Micro SD card when it is in use may cause data loss or cause an application error. Please make sure the Micro SD card is not being used before it is removed.

1. Touch the silver Windows button to enter the desktop mode
2. Touch the notification area icon which is in the bottom right of the screen to delete Hardware safety. 

 Note: If you do not see the Safely Remove Hardware  , touch the notification area icon to display all hidden icons.

3. Touch **Eject the SD card**. A message appears confirming that you can safely remove the Micro SD card. If the warning message appears showing the Micro SD card cannot be removed, please ensure that all data related to the Micro SD card transfer have been completed.
4. Press the Micro SD in to the slot slightly and the card will be released
5. Take out Micro SD card

5.7 Using earphones / headset

 Warning: Listening to loud music may cause hearing loss

1. Insert the headset or earphones into the Tablets PCs Audio port
2. Put the earphones / headset on and adjust the volume to a comfortable level

 Note: When connecting an audio device to the 3.5mm audio jack, the integrated speakers will be muted automatically

 Note: In order to prevent damage to the earphones, unplug the connector and do not pull on the headphone cable

6 Using the Tablet PC

6.1 Wi-Fi settings

To turn the Wi-Fi On/off:

1. Swipe from the right edge of the screen to access the charms icons
2. Touch the Settings icon  then touch the Internet icon .
3. Swipe the Wi-Fi icon towards the left or right to turn the Wi-Fi on or off

Connect to internet:

1. Swipe from the right edge of the screen to access the super icons
2. Touch the settings icon  then touch the internet available icon .
- 3 Select an available network from the list and get connected

6.2 Touch Gestures

This Tablet PC has a multi-touch LCD and can be controlled with various touches and swipes on the LCD screen

Finger gesture: Touch	Action
<p>Use fingertips to gently click on the display</p> 	<ul style="list-style-type: none"> • Select an item on the screen, including options, entries, images and icons • Start the application • Touch a button on the screen • Use the on-screen keyboard to enter text
Finger gesture: Touch	Action
<p>Press your finger on the display for 2 seconds</p> 	<ul style="list-style-type: none"> • Display detailed information about a project • Open the context menu of a project for further action
Finger gesture: Touch and Drag	Action
<p>Press a project on the screen with your finger</p> <p>Keep touching the display with fingers</p> <p>Move your finger to the desired position</p> <p>Take your finger from the display so that the items relocate to the desired position.</p> 	<ul style="list-style-type: none"> • Moving images, icons and other items on the screen

Finger gesture: Touch and Drag	Action
<p>Press a project on the screen with your finger</p> <p>Keep touching the display with fingers</p> <p>Move your finger to the desired position</p> <p>Take your finger from the display so that the items relocate to the desired position.</p> 	<ul style="list-style-type: none"> • Moving images, icons and other items on the screen
